INCLUSION

“Inclusion is about all of us. It treasures diversity and builds community”

-Anonymous

EDUCATION

“Education is the most powerful weapon which you can use to change the world”

- Nelson Mandela

DIGITALIZATION

“Digitalization means flow: data flow, information flow, knowledge flow, and mind flow”

— Pearl Zhu

Progressivism is a philosophy based on the idea of progress, which asserts the advancements in science, technology, economic development, and social organizations which are vital to the improvement of the human condition. This philosophy can be categorized into 3 essential tenets -

1. Inclusion, the first tenet, is about living full lives, about learning to live together. It is a universal human right with an aim to embrace all people, irrespective of race, gender, disability or other attributes which can be perceived as different. India faces challenges in various aspects of inclusion - from lack of socio-economic inclusion of poor to lack of accommodative rights of disabled.
2. Education, the second tenet, is the process of facilitating learning, or the acquisition of knowledge, skills, values, beliefs, and habits. Education plays a vital role in the growth of a country, both economically and socially.
3. Digitalization, the third tenet, is the change associated with the application of digital technology in all aspects of human society. Technology can play a vital role in realising the vision for India's growth. It is at the core of a progressive India.

IIM Calcutta, over the years, has ensured that the ideas of progressivism get assimilated in the students through both academics as well as non-academic activities. Intaglio is one such platform. Intaglio invites all students to participate, brainstorm, learn, collaborate as well as compete in this enlightened gathering of thinkers and problem solvers, thus contributing in building a more inclusive, literate and digitalized world.
